Project timeline

- 17. 2. Saturday - Arrivals
- 18. 2. Sunday - Family activities
- 19. 2. Monday - Exploring Jihlava
- 20. 2. Tuesday - Aircraft manufacturing
- 21. 2. Wednesday - Prague
- 22. 2. Thursday - Lessons and bowling
- 23. 2. Friday - Working on a project
- 24. 2. Saturday - Last day

Arrivals

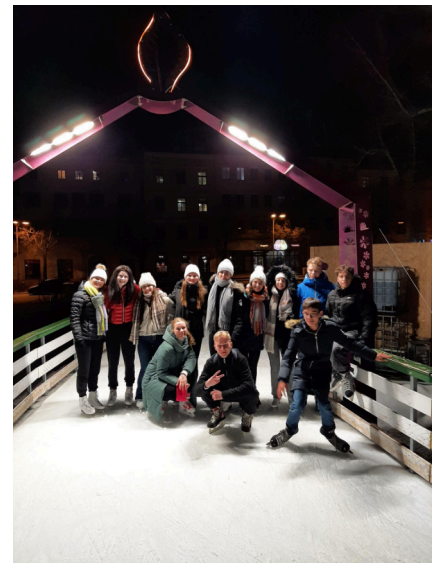

Our spanish friends arrived to Jihlava at 16:50. We picked them up at the train station and everyone went their own way. We went with Lucía and my brother and friend to citypark for shopping. She tasted Starbucks and then we went to restaurant on a family dinner. During the dinner Lucía met my family and got to know them. We talked about everything like what she wants to be and things like that and enjoyed delicious dinner. Well I hope that she enjoyed it as well. So after the dinner we went home so she could unpack and rest after long day.

Family activities

On Sunday we had to do a plan with our families for a whole day. So we decided to go to the zoo in the group of czech and spanish students. The most of catalan's students were impressed with giraffes. They have never seen them before. We were lucky because plenty of animals were outside. We enjoyed it a lot!

Then some students went to the restaurant, McDonald's or like us ate at home. After a short rest at home we went to Telč- beautiful and charming town near Jihlava. On the square some groups of us met. It wasn't planned and we made a photo together. We also took our catalan's students to the patisserie and they had an opportunity to try some desserts, such as „kremrole“.

Exploring Jihlava

The first thing we did on monday was go to our school and do a little tour. Our Catalan friends were surprised at how big and confusing our school is - probably like anyone who goes there for the first time. After the tour of the school, we went outside and reached the church of St. Jacob. We had an English tour from the staff there. After a tour of the interior of the church, we went up to the church tower, from which you can see the entire city of Jihlava. When we got down, we went to the underground below the city square. The tour there was also in English. After this tour we went to a local mall, got some food and went to the fire station. There we again had an English-speaking tour. It was really interesting because we got to try out some of the things that firefighters use. For example, rescue scissors used in car accidents or we tried to slide down a fireman's pole. But the best thing we tried there was a fire truck with an extendable ladder that went over 40 meters! I will add some photos from the whole day. It was really fun.

Aircraft manufacturing

We started our day on the bus stop from which we went by bus to a specific factory neardby Jihlava. The factory was designed for building small airplanes and all the parts necessary for the conctruction of them. We took a part in the guiding tour in which we were shown how everything in the factory works.

Unexpectadly it was really interesting and our catalan friends liked it. After we gained the knowledge of the airplanes, we tried to construct something on our own. This time it was in school with a conctruction plan from our teachers. After 2 hours we finally finished our cartoon aerodynamic airplanes. They were quite solid, not really good looking, but practical. After the programm in the school ended, we visited the school canteene, where we together had a break and lunch.

After that we went by bus to a neardby town, where we did really cool and interesting activity horse riding. We went on a walk with the horses together and with our catalan friends. It was really nice and relaxing. We spent some time together and learned something new. Eventually all of us got home and had their own activities to do with the family.

Trip to Prague

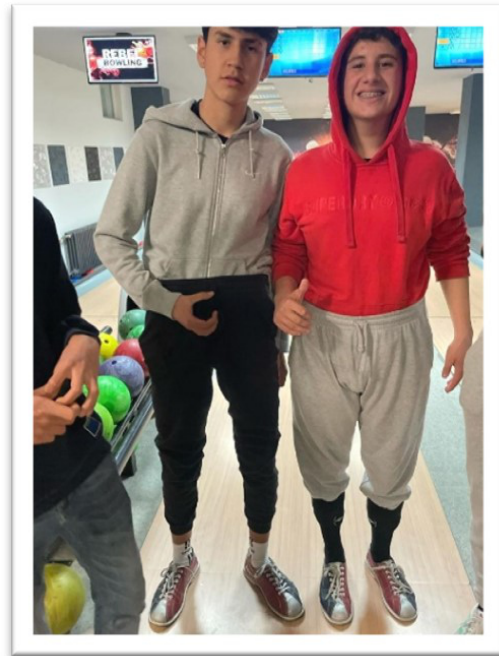

Our fifth day together began early at the bus station in Jihlava, where our trip to Prague began. We arrived in our capital city at about 9:45 AM as we headed to Prague Castle. We visited many landmarks on our way there and finished at 12:00 with the ceremonial changing of the guards at the castle. After the ceremony ended, we split into small groups and explored Prague on our own. Our group for example visited Wenceslas Square, where we visited some shops and then we met with others at the bus station. We got home late in the afternoon, and since the day was really tiring, I think most of us didn't do anything at home.

Lessons and bowling

On Thursday morning we spent at school, where we had subjects such as technology or chemistry. We tried programming robots or the gunpowder experiment.

In the afternoon we went bowling together with our families, when we competed against each other. Pizza was waiting for us as a reward.

Working on a project

This was one of our last days together. We´re working on our project – Our Dream House. We had to do many views of the sepcial house. We made groups. Each group had special work to do. For example one of them was making views from south, north, east and west. Another group was making a 3D model. Others painted a picture of the house. Boys were making a 3D model in PC.

We also had an afternoon program. We went into badminton centre and we played badminton.

Last day

Saturday 24th We have spent our very last day with our Catalan friends on Saturday 24th. Until noon they spent time with their host families and each decided to spend their last time together differently. When the exchange students packed up in the morning, some went on a short trip with their host families, others played some games or went for a walk. In the afternoon we all went to school with our families. everyone brought a dessert or snack, we enjoyed our time together and talked about our experiences. Spanish and Czech students went to finish their final project. The Czech teachers then gave everyone a small farewell gift. Before leaving we played ball games in the gym and enjoyed our last time together. After that we all went to the station where we said goodbye, hugged and some of us even shed a tear.
